BIOGENTS TRAPS, A **HIGHLY EFFECTIVE,** **INSECTICIDE-FREE SOLUTION AGAINST** **MOSQUITOES**

Biogents is the No. 1 solution in France, with offers tailored to private individuals, professionals and local authorities.

Biogents solutions are the most effective on the market, with at least 3 times more catches than other traps, according to a study carried out by an independent organisation.

Biogents traps are used by the entire scientific community.

All our solutions work without insecticides, for sustainable mosquito control that is effective over the long term.

The effectiveness of our solutions is based on more than 20 years of research into mosquito behaviour and is proven by more than 400 independent scientific publications worldwide.

Targeting only mosquitoes, the Biogents trapping system has no impact on beneficial insects such as bees or butterflies.

Our innovative, patented traps reduce mosquito bites by up to 93% over time!

Our Biogents attractant and the use of CO₂ as an attractive substance in our traps, are approved at European level.
Authorisation numbers :
Biogents attractant : FR-2023-0003;
CO₂ : FR-2023-0004.

A COMPLETE SOLUTION FOR SUSTAINABLE MOSQUITO CONTROL

INFORM

The fight against the tiger mosquito is a collective effort.

Communicate the correct behaviour that everyone should practice to avoid stagnant water which is the mosquito's breeding ground.

- ✓ **STORE**
all objects out of the rain
- ✓ **EMPTY**
outdoor containers
(bowls, buckets, watering cans, etc.)
- ✓ **MAINTAIN**
to ensure water drainage

EQUIP YOUR PUBLIC AREAS

Parks, kindergardens, school buildings, outdoor sports facilities, cemeteries, etc.

Metal enclosure equipped with solar panels

HELP YOUR CITIZENS TO PROTECT THEMSELVES

Support the purchase of traps by private individuals: partial refund on proof of purchase, group purchase, loan or donation.

Imitates human presence
(smell, CO₂, air flow)

Imitates a breeding site

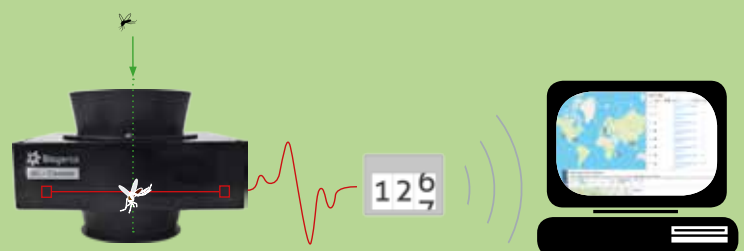

CUTTING-EDGE TECHNOLOGY FOR MAXIMUM EFFICIENCY

BG-COUNTER

PRECISE COUNTING
OF CAPTURED
MOSQUITOES

AUTOMATIC DATA
TRANSMISSION

OPTIMISATION OF
TRAP OPERATION
