

# FINALLY, AN **EFFECTIVE** AND **SUSTAINABLE** SOLUTION AGAINST MOSQUITOES

For hotels, restaurants, camp sites and other outdoor areas

**Biogents**

# A COMPLETE SOLUTION TO RECLAIM YOUR OUTDOOR SPACE

## REDUCE BITES

### BG-PROTECTOR TRAP

Imitates human presence (smell, CO2, air flow...)

Catches mosquitoes that are searching for a host

Optimization of efficacy with the BG-Counter

## REDUCE REPRODUCTION

### BG-GAT Reflect-Tech TRAP

Imitates a breeding site

Captures those mosquitoes that want to lay their eggs

DOUBLE ACTION, DOUBLE EFFECTIVENESS

## INFORM YOUR CUSTOMERS

You invest in your customers' wellbeing - make it visible.

The high-quality metal enclosure serves as a professional communication surface, allowing you to showcase your mosquito reduction initiatives and emphasize your commitment to providing a safe and comfortable experience.

Optional metal enclosure equipped with solar panels

## REGULAR SUPPORT TO ENSURE LONG-TERM SUCCESS

On-site maintenance visits  
Remote data analysis

# A CUSTOMISED SOLUTION THANKS TO OUR LOCAL PARTNERS

## 1. SITE VISIT

- Identifying infested areas to protect
- Definition of suitable solutions

## 2. INSTALLATION

- Identification of the best locations for traps to ensure maximum effectiveness
- Installation of the trap system: a scalable network suitable for all properties

## 3. MONTHLY MAINTENANCE to maintain optimum efficiency

- Elimination of new breeding sites
- Checking traps
- Replacement of attractants and CO2
- Implementation of improvements if necessary

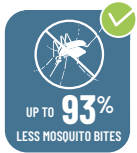

# AN ANTI-MOSQUITO SOLUTION THAT IS BOTH HIGHLY EFFECTIVE AND INSECTICIDE-FREE

The effectiveness of our solutions is based on more than 20 years of research into mosquito behaviour and is proven by more than 400 independent scientific publications worldwide.

All our solutions work without insecticides, for an effective and long-lasting mosquito control.

Our innovative, patented traps reduce mosquito bites by up to 93% over time.

Targeting only mosquitoes, the Biogents trapping system has no impact on beneficial insects such as bees or butterflies.

Biogents solutions are the most effective on the market, with at least three times more catches than other traps, according to a study from an independent organisation.

Energy consumption of Biogents traps is very low: 3W for the BG-Protector trap.

## THEY TRUST US

„Since we installed the Biogents solution, it's like night and day. My customers can finally enjoy the outdoors and the pool without being eaten by mosquitoes.“
